

# ERNÆRINGSTILSTAND & CANCERRISIKO

**Signe Borgquist**  
**Lærestolsprofessor, ledende overlæge**  
**Kræftafdelingen, AUH/Institut for Klinisk Medicin**

# GLOBESITY - OGSÅ I DANMARK

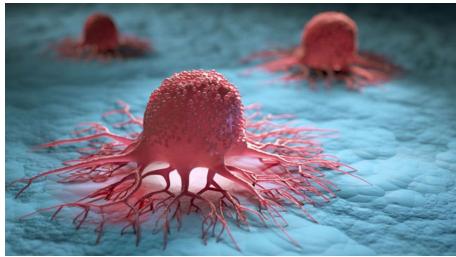

I DK: **53%** har overvægt  
( $\text{BMI} \geq 25 \text{kg/m}^2$ )

I DK: **18%** har svær overvægt  
( $\text{BMI} \geq 30 \text{kg/m}^2$ )

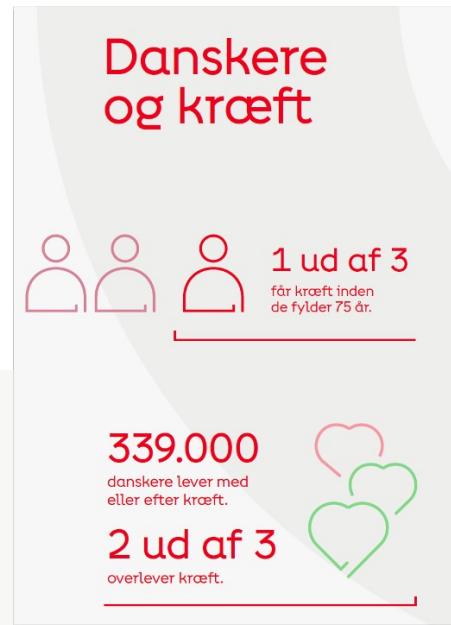

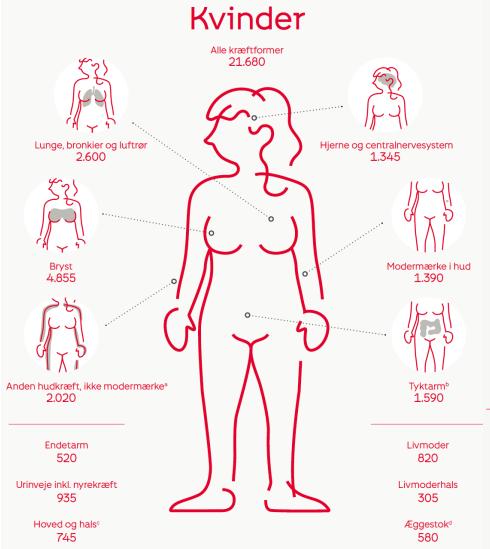

Overvægt forventes stige  
til **66%** i år 2045 (DK)

# KRÆFT I TAL

Hyppige kræftsygdomme hos kvinder – nye tilfælde i 2020

DSKE  
3 MAY 2024

## Om overvægt og følgesygdomme

FORSKNINGSTEMA

## Om (svær) overvægt og følgesygdomme og -tilstande

Delt:    

Overvægt og diverse følgesygdomme og -tilstande bliver tit nævnt i samme sætning, men sammenhængen er ikke altid helt ligetil. Derfor forsøger vi dette forskningstema at skabe et overblik.

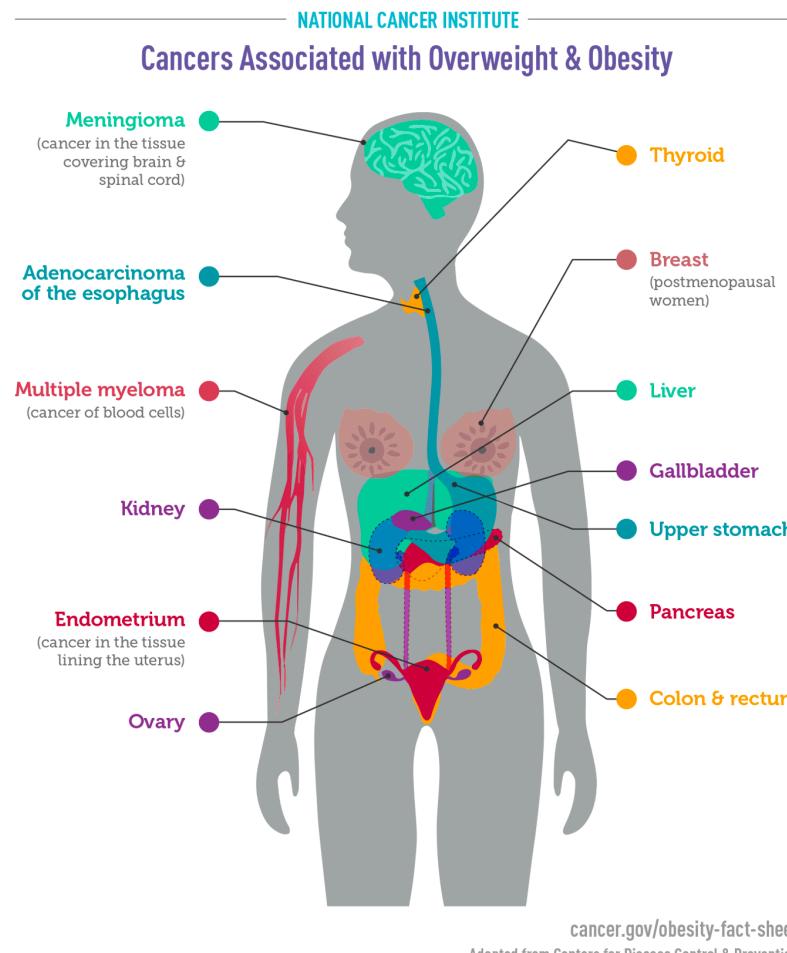

WHO angiver overvægt og svær  
overvægt som den femte største

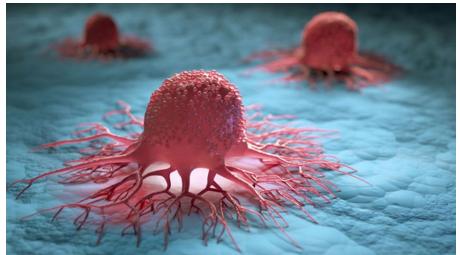

# OVERVÆGT OG KRÆFTRISIKO

## CARCINOGENESE v KRÆFT:

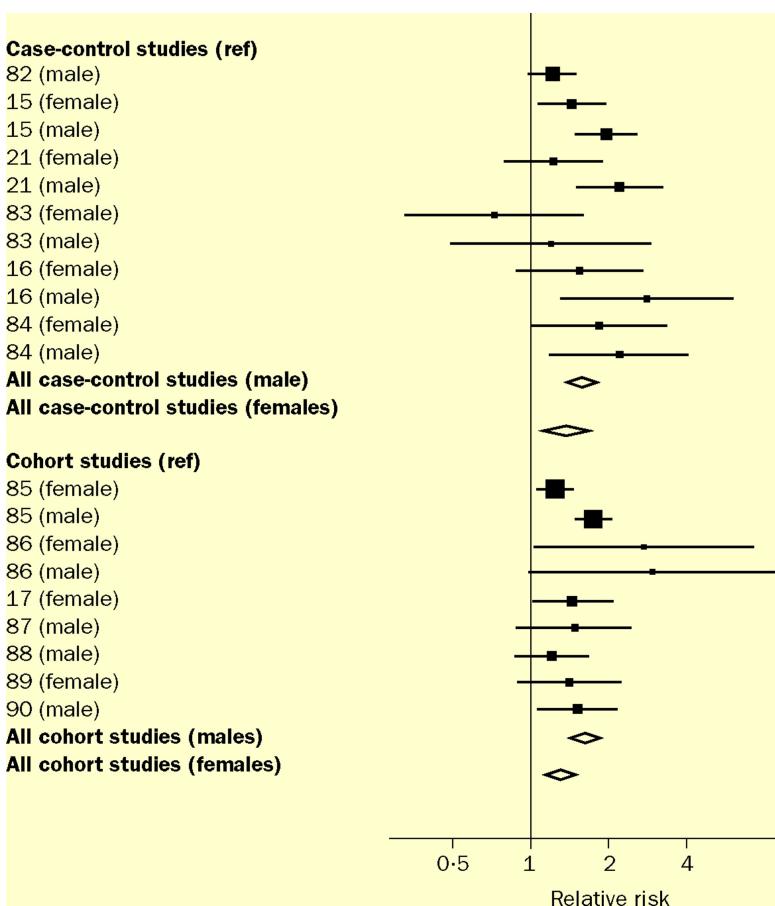

- Abdominal fedme
- Fedtvævs dysfunction
- Endogene hormone
  - Kønshormoner
  - Væksthormoner
- Kronisk inflammation
  - nedsat immunrespons

An aerial photograph of a modern architectural feature. A large, circular glass-enclosed walkway or viewing platform is built over a body of water. The walkway is supported by a central pillar and has a curved metal railing. People can be seen walking on the walkway. In the background, there is a sandy beach and some greenery. The water is calm with some ripples.
